

LEARN

Ignite passion in your health science classroom by attending an engaging, multi-sensory, hands-on workshop of human anatomy. Attendees will play the role of a student, participating in learning activities of each of the following systems:

- Skeletal
- Muscular
- Nervous
- Digestive
- Urinary
- Cardiovascular
- Lymphatic

BUILD

Attendees will build a vast selection of human body systems by applying clay onto MANIKEN® models. This active hands-on approach to anatomy reinforces learning and empowers attendees with a strong sense of accomplishment. The activity of building the human from the inside out reverses the traditional method of learning anatomy - through dissection - with proven results.

EMBODY

Through embodying the pedagogy of the ANATOMY IN CLAY® Learning System, attendees gain a profound understanding of how the body systems are interconnected in form and function.

EXPLORE

This workshop provides an ideal learning environment for Anatomy, Health Science and Orthopedic educators in elementary through university level programs. Whether you are looking to fulfill professional development credits, have an interest in learning more about the ANATOMY IN CLAY® Learning System, have the system and are looking for training, or just want to improve upon your base knowledge of anatomy, this workshop is perfect for you. CEUs through an accredited college are available.
